RPAG scorecard: Top scoring Putnam funds

At Putnam Investments, we take a proactive approach to managing volatility and pursuing superior results.

These Putnam funds scored 8 or higher on the Retirement Plan Advisory Group (RPAG) proprietary Scorecard system.*

Putnam Retirement Advantage Target-Date Funds	Class	Ticker	CUSIP	RPAG Score	
<ul style="list-style-type: none"> • Our glide path starts out more aggressively before growing more conservative as the target date nears • We dynamically allocate across asset classes, not across a portfolio of existing funds • Our Global Asset Allocation team takes a comprehensive approach — maintaining full control of every aspect of the funds' investments • Because Retirement Advantage Funds are collective investment trusts, this lower-cost expense structure is not available to retail investors 	Putnam Retirement Advantage 2055	I	—	74674P104	8
	Putnam Retirement Advantage 2050	I	—	746751106	9
	Putnam Retirement Advantage 2045	I	—	746751171	9
	Putnam Retirement Advantage 2040	I	—	746751247	9
	Putnam Retirement Advantage 2035	I	—	746751312	9
	Putnam Retirement Advantage 2030	I	—	746751387	9
	Putnam Retirement Advantage 2025	I	—	746751452	8
	Putnam Retirement Advantage 2020	I	—	746751528	8
	Putnam Retirement Advantage Maturity	I	—	746751809	8

Putnam Dynamic Asset Allocation Funds	Class	Ticker	CUSIP	RPAG Score	
<ul style="list-style-type: none"> • Diversified across more than 10 asset classes to benefit from a range of opportunities • Disciplined selection of individual stocks and bonds to finely tune the portfolio and avoid the risk of overlapping positions in a fund-of-funds approach • Active portfolio rebalancing to maintain consistent asset allocation and long-term risk profile 	Balanced Fund	Y	PABYX	746444884	9
		R6	PAAEX	746444769	9
	Growth Fund	Y	PAGYX	746444702	9

	Conservative Fund	Y	PACYX	746444801	10
		R6	PCCEX	746444744	10

* The Scorecard System methodology incorporates both quantitative and qualitative factors into evaluating fund managers and their investment strategies. To be scored, there is a fund history requirement (5 years for active strategies and 3 years for passive strategies). The scoring system is built around pass/fail criteria, on a scale of 0–10 (with 10 being the best). Eighty percent of the score is quantitative, and 20% is qualitative. For active and asset allocation strategies, the scorecard factors are weighted 30% to style, 30% to risk/return, and 20% to qualitative factors (manager tenure, expense ratio relative to category average, and strength of statistics). For active asset allocation and passive strategies, other significant factors may be taken into account when considering a fund's qualitative score.

Putnam Equity Income Fund (Value)	Class	Ticker	CUSIP	RPAG Score
<ul style="list-style-type: none"> A focus on large, dividend-paying companies whose stocks are priced below their long-term potential 	Y	PEIYX	746745405	10

Each Retirement Advantage Fund has a different target date indicating when the fund's investors expect to retire and begin withdrawing assets from their account, typically at retirement. The funds are generally weighted more heavily toward more aggressive, higher-risk investments when the target date of the fund is far off, and more conservative, lower-risk investments when the target date of the fund is near. This means that both the risk of your investment and your potential return are reduced as the target date of the particular fund approaches, although there can be no assurance that any one fund will have less risk or more reward than any other fund. The principal value of the funds is not guaranteed at any time, including the target date.

Consider these risks before investing: International investing involves currency, economic, and political risks. The funds may invest a portion of their assets in small and/or midsize companies. Such investments increase the risk of greater price fluctuations. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Lower-rated bonds may offer higher yields in return for more risk. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk and the risk that they may increase in value less when interest rates decline and decline in value more when interest rates rise. *Money market options are not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other governmental agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this fund.* Allocation of assets among asset classes may hurt performance, and efforts to diversify risk through the use of leverage and allocation decisions may not be successful. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Interest-rate risk is greater for longer-term bonds, and credit risk is greater for below-investment-grade bonds. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. The market may not favor value-style investing. Income provided by the fund may be reduced by changes in the dividend policies of, and the capital resources available at, the companies in which the fund invests. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Stock and bond prices may fall or fail to rise over time for several reasons, including general financial market conditions and factors related to a specific issuer or industry. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Unlike bonds, funds that invest in bonds have fees and expenses. Active trading strategies may lose money or not earn a return sufficient to cover trading and other costs. Use of leverage obtained through derivatives increases these risks by increasing investment exposure. Over-the-counter derivatives are also subject to the risk of the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. REITs are subject to the risk of economic downturns that have an adverse impact on real estate markets. The use of short selling may result in losses if the securities appreciate in value. Commodities involve market, political, regulatory, and natural conditions risks. You can lose money by investing in the funds.

Your clients should carefully consider the investment objectives, risks, charges, and expenses of a fund before investing. For a prospectus, or a summary prospectus if available, containing this and other information for any Putnam fund or product, call the Putnam Client Engagement Center at 1-800-354-4000. Your clients should read the prospectus carefully before investing.
