\* Tax rules impose limitations on the capital losses acquired as a result of a past fund merger, allowing only a portion to be utilized by the fund each year. As a result, the fund is estimated to make a capital gain distribution, and will also carry forward any losses not allowed to be used in the current year. These losses may be used to offset future capital gains, if any, under the allowance set by the Internal Revenue Code.

Estimated loss carryforwards from the previous Fiscal Year (ending April 2016 to March 2017). The percentage of loss carryforwards will fluctuate with the net assets of the fund and should be used as a guideline only. These numbers are estimates of book, not tax, numbers. In accordance with tax regulations, capital loss carryforwards incurred in taxable years beginning after December 22, 2010, may be carried forward indefinitely, whereas those incurred prior to this date can only be carried forward for eight years. See the funds' annual report for details.
