Data is historical. Past performance is not a guarantee of future results. More recent returns may be more or less than those shown. Investment return and principal value will fluctuate, and you may have a gain or a loss when you sell your units. Performance assumes reinvestment of distributions at net asset value (NAV) and reflects fund operating expenses such as management fees but does not account for any taxes or sales charges. The payment of any sales charges will reduce performance.

Institutional class E offers lower fees, but are subject to investment minimums. See the Prospectus for details. For a portion of the periods, the fund may have benefited from a subsidy provided by the manager.

Top 10 holdings may, at times, exclude certain holdings that are used for cash equitisation and are short term in nature. The Russell 1000 Growth Index is an unmanaged index of those companies in the large-cap Russell 1000 Index chosen for their growth orientation. It is not possible to invest directly in an index. Market-cap allocations are based on Morningstar's equity style box methodology.

The Fund is a subfund of Putnam World Trust, an umbrella unit trust domiciled in Ireland. The trust is established as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended).

Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing. The prices of stocks in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including both general financial market conditions and factors related to a specific company or industry.
