# Putnam International Equity Fund

Pursuing the growth potential of overseas markets since 1991

**International companies**

The fund invests in established large and midsize companies, mainly in developed markets to benefit from opportunities outside the United States.

**A flexible strategy**

Pursuing Putnam’s blend strategy, the fund can own growth- or value-style stocks to participate when either style leads international markets.

**A disciplined process**

The portfolio managers invest using fundamental research and quantitative tools supported by strong risk controls in portfolio construction.

**Fundamental investment research determines top holdings and country weightings**

Top ten holdings		Country		● Fund	● MSCI EAFE Index (ND)
Total	2.22%	Japan	23.1%	24.6%	
Rio Tinto (UK)	2.13	Germany	12.5	9.7	
Prudential	2.11	United Kingdom	12.1	17.0	
Sony	2.03	France	10.5	10.9	
ING Groep	2.02	Netherlands	7.2	3.2	
Bayer	2.00	Switzerland	3.9	7.8	
Magna International	1.99	Canada	3.8	0.0	
Unilever	1.99	Ireland	3.0	0.6	
Orix	1.98	China	2.8	0.1	
Siemens	1.93	United States	2.7	0.3	
		Other countries	15.3	25.8	

Holdings represent 20.40% of the portfolio and will vary over time.

Cash and net other assets represent 3.23% of the portfolio.

**Growth of a \$10,000 investment**

The fund has returned an average of 7.6% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares before their inception are derived from the historical performance of class A shares (inception 2/28/91), which have not been adjusted for the lower expenses; had they, returns would have been higher. Recent performance may have benefited from one or more legal settlements. For the most recent month-end performance, please visit putnam.com.

\*Based on annualized returns for quarterly rolling periods.

The MSCI EAFE Index (ND) is an unmanaged index of equity securities from developed countries in Western Europe, the Far East, and Australasia. You cannot invest directly in an index.

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

**Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility; a beta of more than 1.0, higher volatility than the benchmark. The **price-earnings ratio** of a firm's common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Earnings per share (EPS)** is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take "expected" earnings for the current year or for future years to calculate other P/E ratios.

Not all share classes are available on all platforms.

**Consider these risks before investing:** International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. Stock prices may fall or fail to rise over time for a variety of reasons, including general financial market conditions, changing market perceptions, changed in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. You can lose money by investing in the fund.

**Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.**
