Putnam International Growth Fund

Harnessing the potential of international growth companies since 1995

International growth

The fund invests in international companies that the manager believes have sustainable above-average earnings growth.

Diverse companies

The portfolio includes large companies that dominate their industries and midsize companies that may be emerging industry leaders.

A rigorous process

The fund follows a disciplined investment process with fundamental stock selection supported by quantitative tools and macroeconomic analysis.

Fundamental investment research determines top holdings and country weightings

Top ten holdings		Country		● Fund	● MSCI EAFE Growth Index (ND)
AstraZeneca	2.90%	Japan	16.6%	24.4%	
Airbus Group	2.87	United Kingdom	16.2	11.1	
Prudential	2.51	France	10.5	11.9	
Kering	2.39	Netherlands	6.7	5.8	
ASML Holding	2.25	Canada	6.2	0.0	
Visa	2.22	Germany	5.7	7.4	
Ashtead Group	2.22	China	5.7	0.1	
Tencent	2.19	United States	5.5	0.5	
Heineken	2.01	Switzerland	3.9	13.1	
Constellation Software	1.96	India	2.7	0.0	
Holdings represent 23.52% of the portfolio and will vary over time.		Other countries	17.4	25.7	

Cash and net other assets represent 3.0% of the portfolio.

Due to rounding, percentages may not equal 100%.

Growth of a \$10,000 investment

The fund has returned an average of 6.4% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares prior to their inception is derived from the historical performance of class A shares (inception 1/3/95), which have not been adjusted for the lower expenses; had they, returns would have been higher. Recent performance may have benefited from one or more legal settlements. For the most recent month-end performance, please visit putnam.com.

Effective 12/20/19, Jeffrey Sacknowitz left Putnam and was replaced as Portfolio Manager by Shep Perkins.

The MSCI EAFE Growth Index (ND) is an unmanaged index which measures the performance of equity securities in countries within Europe, Australasia, and the Far East with a greater-than-average growth orientation. You cannot invest directly in an index.

Because the dollar amount of the monthly performance fee adjustment is based on the fund’s average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund’s current assets could exceed the “maximum annualized performance adjustment rates.” Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

Earnings per share (EPS) is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take “expected” earnings for the current year or for future years to calculate other P/E ratios. The **price-earnings ratio** of a firm’s common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Beta** is defined as a fund’s sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, Since Inception analysis is used. Because the dollar amount of the monthly performance fee adjustment is based on the fund’s average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund’s current assets could exceed the “maximum annualized performance adjustment rates.” Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Not all share classes are available on all platforms.

Consider these risks before investing: International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing. The value of investments in the fund’s portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, asset class, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund’s portfolio holdings. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
