Putnam International Capital Opportunities Fund

Harnessing the potential of international small and midsize companies since 1995

Quality companies

The fund invests in developed non-U.S. markets, seeking high-quality small companies believed to be priced at a discount to their intrinsic value.

Disciplined process

The fundamental research process is designed to find companies that offer a franchise, a cyclically depressed stock price, or transformative business potential.

Active in an inefficient universe

The managers seek outperformance (alpha) by building a concentrated portfolio differentiated from the benchmark, taking stock-specific risk with a long-term investment horizon.

Top 10 holdings

Company	Weight
Dassault Aviation	3.25%
Cogeco Communications	2.99
OPAP	2.80
Lite-On Technology	2.73
Fukui Computer	2.61
Japan Material	2.53
Domino's Pizza	2.42
Logista	2.41
Eurazeo	2.39
Berkeley Group	2.37

Holdings represent 26.50% of the portfolio and will vary over time.

Country weightings

Country	Underweight	Overweight	Portfolio	Benchmark
Taiwan		6.6	6.6%	0.0%
France		6.0	13.1	7.1
Greece		4.9	4.9	0.0
United Kingdom		2.9	14.2	11.3
Japan		2.7	22.7	20.0
Canada	-1.9		8.5	10.4
Australia	-3.7		3.4	7.1
Sweden	-4.0		0.0	4.0
Switzerland	-4.3		2.1	6.4
Germany	-4.8		1.6	6.4
Other countries			20.5	27.3

Cash and net other assets represent 2.4% of the portfolio. Due to rounding, percentages may not equal 100%.

Market-cap breakdown

Market Cap	Percentage
Over \$10B	11.05%
\$5B-\$10B	20.47
\$3B-\$5B	15.85
\$1B-\$3B	36.70
Less than \$1B	13.55
Cash and other assets	2.37

"Cash and other assets" includes cash, short-term securities, ETFs, bonds excluding convertible bonds, and other securities not able to be classified by market capitalization.

Risk (Y shares, as of 3/31/22)

Beta	0.97
Tracking error	4.25%
Up capture ratio	101.61%
Down capture ratio	100.64%

Capture ratios are used to evaluate how well an investment manager performed relative to an index during specific periods (periods of positive return in the case of up capture, negative return in the case of down capture). The ratio is calculated by dividing the manager's returns by the returns of the index during the period and multiplying that factor by 100. **Turnover** is the rate at which the fund buys and sells securities each year. For example, if a fund's assets total \$100 million and the fund bought and sold \$100 million of securities that year, its portfolio turnover rate would be 100%. **Beta** is defined as a fund's sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 3-year regression analysis. For funds with shorter track records, Since Inception analysis is used. **Tracking error** assesses how closely a fund's performance tracks that of the fund's benchmark by calculating the standard deviation of the difference between the fund's returns and its benchmark returns over a given time period, typically 5 years.

Not all share classes are available on all platforms.

Benchmark	-3.34	9.13	7.53	8.02	7.17

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class A and Y shares assumes reinvestment of distributions and does not account for taxes. After-sales-charge returns for class A reflect a maximum 5.75% load. Returns for class Y shares prior to their inception are derived from the historical performance of class A shares, which have not been adjusted for their lower expenses; had they, returns would have been higher. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com.

Highlights of five-year performance periods (12/28/95–3/31/22)*

	Best 5-year return	Best period end date	Worst 5-year return	Worst period end date	Average 5-year return	% of 5-year periods with positive returns	Number of positive 5-year periods	Number of negative 5-year periods
Y shares	29.08%	9/30/07	-5.09%	6/30/12	7.77%	86%	74	12
A shares	28.77	9/30/07	-5.33	6/30/12	7.53	85	73	13

* Based on annualized returns for quarterly rolling periods.

The S&P Developed Ex-U.S. SmallCap Index is an unmanaged index of small-cap stocks from developed countries, excluding the United States. You cannot invest directly in an index.

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Morningstar rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Morningstar. Morningstar rankings may differ significantly from Morningstar's risk-adjusted star ratings. Past performance is not indicative of future results.

Consider these risks before investing: The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings.

International investing involves currency, economic, and political risks. Emerging market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
