# Putnam Equity Income Fund

Seeking to harness the power of stock dividends since 1977

**A large-value focus**

The fund focuses on large companies whose stocks are priced below their long-term potential, and where there may be a catalyst for positive change.

**Dividend growth**

The fund places a distinct emphasis on companies that can grow their dividends and are able and willing to return cash to shareholders.

**A disciplined process**

The portfolio manager invests using fundamental research and quantitative tools supported by strong risk controls in portfolio construction.

**Fundamental investment research determines top holdings and sector weightings**

**Growth of a \$10,000 investment**

The fund has returned an average of 10.2% annually since inception. Plotted on a logarithmic scale so that comparable percentage changes appear similar.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class A shares assumes reinvestment of distributions and does not account for taxes. Returns do not reflect a 5.75% sales charge; had they, returns would have been lower. Lipper rankings for class A shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

**Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility; a beta of more than 1.0, higher volatility than the benchmark.

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Putnam Equity Income Fund received 3, 4, and 4 stars for the 3-, 5-, and 10-year periods among 1,091, 936, and 681 Large Value funds, respectively.

**Consider these risks before investing:** Value stocks may fail to rebound, and the market may not favor value-style investing. Income provided by the fund may be reduced by changes in the dividend policies of, and the capital resources available at, the companies in which the fund invests. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions, changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. You can lose money by investing in the fund.
