Putnam International Value Fund

Seeking to benefit from undervalued international companies poised to experience positive change

International companies

The fund provides broad exposure to established large-cap non-U.S. companies trading at a discount to their intrinsic value.

A value strategy

This relative-value fund focuses on companies that the managers believe possess a catalyst for positive change.

A disciplined process

The portfolio managers invest using fundamental research and quantitative tools supported by strong risk controls in portfolio construction.

Fundamental investment research determines top holdings and country weightings

Top ten holdings		Country		● Fund	● MSCI EAFE Value Index (ND)
ING Groep	4.22%	Japan	20.0%	22.6%	
Royal Dutch Shell	3.15	France	16.2	11.0	
Sanofi	2.70	United Kingdom	15.5	19.4

		Other countries	12.2	18.7	

Cash and net other assets represent 2.1% of the portfolio.

Growth of a \$10,000 investment

The fund has returned an average of 6.0% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares before their inception are derived from the historical performance of class A shares (inception 8/1/96), which have not been adjusted for the lower expenses; had they, returns would have been higher. For the most recent month-end performance, please visit putnam.com.

The MSCI EAFE Value Index (ND) is an unmanaged index which measures the performance of equity securities representing the value style in countries within Europe, Australasia and the Far East. You cannot invest directly in an index.

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

Beta measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility; a beta of more than 1.0, higher volatility than the benchmark. The **price-earnings ratio** of a firm's common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Earnings per share** (EPS) is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take "expected" earnings for the current year or for future years to calculate other P/E ratios.

Not all share classes are available on all platforms.

Consider these risks before investing: International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Value stocks may fail to rebound, and the market may not favor value-style investing. Stock prices may fall or fail to rise over time for a variety of reasons, including general financial market conditions and factors related to a specific issuer or industry. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
