Morningstar category

High Yield Bond

Lipper category

High Yield

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher (A-3 or higher, for short-term debt) is considered investment grade. This chart reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings and portfolio credit quality will vary over time. Cash and net other assets, if any, represent the market value weights of cash, derivatives, and short-term securities in the portfolio. **The fund itself has not been rated by an independent rating agency.**

Putnam High Yield Fund

Seeking a high level of income for investors since 1986

Income focused

The portfolio managers strive for a higher level of income than most bonds offer by investing in higher-yielding, lower rated corporate bonds.

Focus on performance

The managers can invest across a range of industries and companies, and can adjust the fund's holdings to capitalize on market opportunities.

Leading research

The fund's managers, supported by Putnam's fixed-income research division, analyze a range of bonds to build a diversified portfolio.

Diversification across market sectors

Consumer cyclicals	18.9%
Basic materials	14.8
Energy	13.9
Communication services	10.4
Financials	9.3
Health care	7.7
Consumer staples	6.8
Capital goods	6.8
Technology	6.6
Utilities	3.0
Transportation	0.3
Non-cash investments	-0.6
Net cash	1.7

Allocations will vary over time. Allocations may not total 100% of net assets because the table includes the notional value of derivatives (the economic value for purposes of calculating periodic payment obligations), in addition to the market value of securities.

Maturity breakdown

0 to 1 year	9.5%
1 to 5 years	42.6
5 to 10 years	42.5
10 to 15 years	2.9
Over 15 years	2.6

Portfolio quality

A	0.3%
BBB	6.6
BB	38.0
B	35.8
CCC and below	15.1
Not rated	2.6
Net cash	1.7

Holdings represent 100% of the portfolio and will vary over time.

Growth of a \$10,000 investment

With dividends reinvested, the fund has returned an average of 7.5% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares before their inception are derived from the historical performance of class A shares (inception 3/25/86), which have not been adjusted for the lower expenses; had they, returns would have been higher. For the most recent month-end performance, please visit putnam.com.

**Not FDIC insured
May lose value
No bank guarantee**

The fund received a 4-star Overall Morningstar Rating as of 3/31/18 among 588 funds in the High Yield Bond category (Y shares, based on risk-adjusted returns)

Highlights of five-year performance periods (3/25/86–3/31/18)*

Best 5-year return	Best period end date	Worst 5-year return	Worst period end date	Average 5-year return	% of 5-year periods with positive returns	Number of positive 5-year periods	Number of negative 5-year periods
18.71%	12/31/95	-2.56%	9/30/02	7.91%	96%	105	4

* Based on annualized returns for quarterly rolling periods.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Putnam High Yield Advantage Fund received 3, 3, and 4 stars for the 3-, 5-, and 10-year periods among 588, 488, and 319 High Yield Bond funds, respectively.

Average effective duration provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **Standard deviation** measures how widely a set of values varies from the mean. It is a historical measure of the variability of return earned by an investment portfolio.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

Not all share classes are available on all platforms.

Consider these risks before investing: Bond prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions (including perceptions about the risk of default and expectations about monetary policy or interest rates), changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may also lead to increased volatility in the financial markets and reduced liquidity in the fund's portfolio holdings. Lower-rated bonds may offer higher yields in return for more risk. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Unlike bonds, funds that invest in bonds have fees and expenses. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
