Putnam Growth Opportunities Fund

Seeking to harness the growth potential of large U.S. companies

Seeks above-average growth

The fund invests in large U.S. companies with a competitive edge and strong earnings and cash flows that can lead to better growth potential.

A thematic approach

The portfolio managers combine top-down investment themes with bottom-up research to select securities that can benefit from growth trends.

Rigorous analysis

Backed by fundamental research, the portfolio managers seek to take advantage of market opportunities and differentiated views.

Fundamental investment research determines top holdings and sector weightings

Top ten holdings		Sector	● Fund	● Russell 1000 Growth Index
Alphabet	6.27%	Information technology	38.8%	37.6%
Visa	5.27	Consumer discretionary	17.8	17.7
Amazon	5.19	Health care	16.1	13.8
Microsoft	4.72	Industrials	11.3	12.5
Facebook	4.37	Financials	5.7	3.4
Apple	4.24	Materials	3.7	3.8
BD Medical	2.55	Consumer staples	2.9	6.7
Northrop Grumman	2.45	Energy	1.7	0.9
Home Depot	2.42	Real estate	0.6	2.6
Alibaba	2.36	Utilities	0.0	0.0
		Telecommunication services	0.0	1.0

Holdings represent 39.84% of the portfolio and will vary over time.

Cash and net other assets represent 1.3% of the portfolio.

Growth of a \$10,000 investment

The fund has returned an average of 8.0% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares before their inception are derived from the historical performance of class A shares (inception 10/2/95), which have not been adjusted for the lower expenses; had they, returns would have been higher. Recent performance may have benefited from one or more legal settlements. For the most recent month-end performance, please visit putnam.com.

**Not FDIC insured
May lose value

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Putnam Growth Opportunities Fund received 3, 4, and 5 stars for the 3-, 5-, and 10-year periods among 1,259, 1,125, and 800 Large Growth funds, respectively.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

Beta measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility; a beta of more than 1.0, higher volatility than the benchmark. The **price-earnings ratio** of a firm's common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Earnings per share** (EPS) is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take "expected" earnings for the current year or for future years to calculate other P/E ratios.

Not all share classes are available on all platforms.

Consider these risks before investing: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions and factors related to a specific company or industry. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
