Putnam Sustainable Future Fund (PMVAX)

Investing in growing companies solving sustainability challenges

Impact companies

The fund invests in growth companies that directly demonstrate positive impact in social, environmental, or economic development.

Active strategy

The managers utilize bottom-up research to identify companies with attractive sustainability, fundamental, and valuation characteristics.

Veteran team

A dedicated sustainable investing team is backed by Putnam's equity research and quantitative/risk analysis groups.

Fundamental investment research determines top holdings and sector weightings

Top ten holdings		Sector		● Fund	● Russell Midcap Growth Index
Adobe	3.58%	Information technology	30.2%	36.9%	
Danaher	3.37	Health care	24.1	22.8	
Thermo Fisher Scientific	2.89	Industrials	11.8	11.9	
Chipotle Mexican Grill	2.40	Consumer discretionary	9.8	11.0	
GoDaddy	2.16	Materials	6.1	2.2	
RingCentral	2.07	Financials	5.9	3.8	
Dynatrace	2.07	Consumer staples	5.6	4.2	
First Republic Bank	2.02	Communication services	1.5	5.2	
DocuSign	1.96	Utilities	1.5	0.1	
McCormick & Co.	1.94	Energy	0.0	0.4	
		Real estate	0.0	1.5	

Holdings represent 24.46% of the portfolio and will vary over time.

Cash and net other assets represent 3.5% of the portfolio.

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

Growth of a \$10,000 investment

The fund has returned an average of 10.2% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class A shares assumes reinvestment of distributions and does not account for taxes. Returns do not reflect a 5.75% sales charge; had they, returns would have been lower. For the most recent month-end performance, please visit putnam.com.

Price to earnings

37.42

Projected 5-yr EPS growth

11.69

Earnings per share (EPS) is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take “expected” earnings for the current year or for future years to calculate other P/E ratios. The **price-earnings ratio** of a firm’s common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Beta** is defined as a fund’s sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, since inception analysis is used.

For informational purposes only. Not an investment recommendation.

Consider these risks before investing: The value of investments in the fund’s portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund’s portfolio holdings. Growth stocks may be more susceptible to earnings disappointments, technological obsolescence, falling prices and profits, and the market may not favor growth-style investing. Investments in small and midsize companies increase the risk of greater price fluctuations. International investing involves currency, economic, and political risks. Emerging-market securities have illiquidity and volatility risks. The fund’s sustainable and environmental, social, and/or corporate governance (ESG) investment strategy may cause the fund to forego otherwise attractive investment opportunities or may increase or decrease the fund’s exposure to certain types of companies and, therefore, to underperform funds that do not invest with a similar focus. From time to time, the fund may invest a significant portion of its assets in companies in one or more related industries or sectors, which would make the fund more vulnerable to adverse developments affecting those industries or sectors. In evaluating an investment opportunity, we may make investment decisions based on information and data that is incomplete or inaccurate. Due to changes in the products or services of the companies in which the fund invests, the fund may temporarily hold securities that are inconsistent with its sustainable investment criteria. Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund’s other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
