# Putnam Small Cap Growth Fund

Seeking to capitalize on growing small companies

**Small companies**

Often overlooked by Wall Street analysts, the stocks of small companies can represent attractive opportunities.

**A focus on growth**

Small companies tend to be flexible and innovative, and can often expand their earnings at faster rates than larger companies.

**A disciplined process**

The portfolio manager uses a disciplined bottom-up fundamental investment process that focuses on quality and growth.

**Fundamental investment research determines top holdings and sector weightings**

Top ten holdings		Sector		● Fund	● Russell 2000 Growth Index
Wingstop	3.70%	Health care	25.7%	26.4%	
Five Below	2.97	Information technology	24.4	18.5	
Heico	2.88	Consumer discretionary	16.2	14.6	
Bright Horizons Family Solutions	2.80	Industrials	15.4	18.6	
Mercury Systems	2.63	Financials	8.5	7.1	
Novanta	2.61	Communication services	5.3	3.1	
Everbridge	2.47	Consumer staples	1.0	2.9	
Planet Fitness	2.36	Materials	0.9	3.4	
Hamilton Lane	2.30	Real estate	0.2	3.2	
Cable One	2.23	Utilities	0.0	0.5	
		Energy	0.0	1.7	

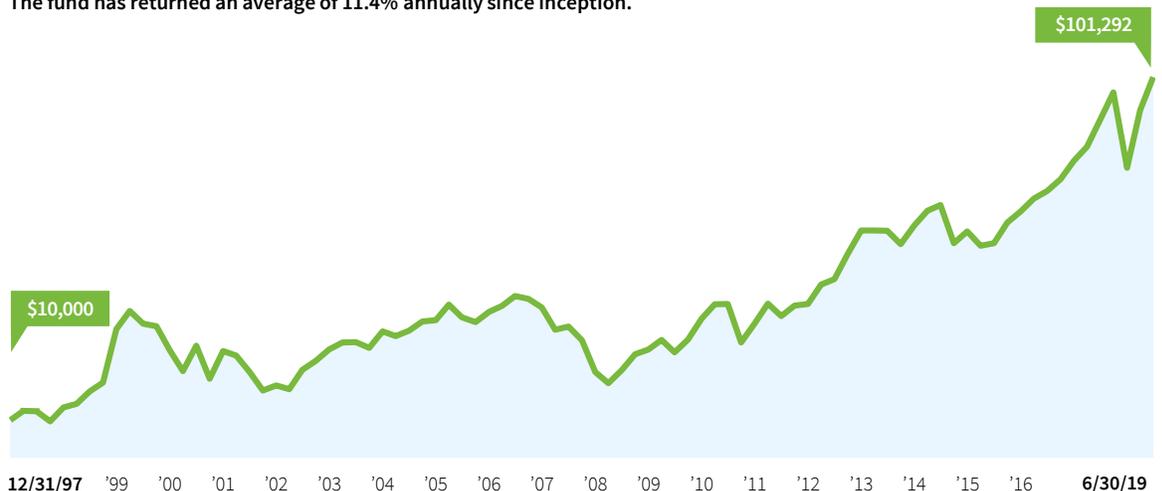

Holdings represent 26.95% of the portfolio and will vary over time.

Cash and net other assets represent 2.4% of the portfolio.

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

**Growth of a \$10,000 investment**

The fund has returned an average of 11.4% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. Performance for class Y shares before their inception are derived from the historical performance of class A shares (inception 12/31/97), which have not been adjusted for the lower expenses; had they, returns would have been higher. For the most recent month-end performance, please visit putnam.com.

Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

**Earnings per share (EPS)** is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take "expected" earnings for the current year or for future years to calculate other P/E ratios. The **price-earnings ratio** of a firm's common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Beta** is defined as a fund's sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, since inception analysis is used. Because the dollar amount of the monthly performance fee adjustment is based on the fund's average assets during the rolling performance period, the amount of any dollar adjustment as a percentage of a fund's current assets could exceed the "maximum annualized performance adjustment rates." Performance fee adjustments will not commence until a fund has been operating under a shareholder-approved management contract with a performance fee adjustment for at least 12 months.

Not all share classes are available on all platforms.

**Consider these risks before investing:** Bond investments are subject to interest-rate risk, which means the prices of the fund's bond investments are likely to fall if interest rates rise. Bond investments also are subject to credit risk, which is the risk that the issuer of the bond may default on payment of interest or principal. Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds, which may be considered speculative. Unlike bonds, funds that invest in bonds have ongoing fees and expenses. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, and factors related to a specific issuer, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. These risks are generally greater for small and midsize companies. From time to time, the fund may invest a significant portion of its assets in companies in one or more related industries or sectors, which would make the fund more vulnerable to adverse developments affecting those industries or sectors. You can lose money by investing in the fund.
