Putnam RetirementReady® Funds

Comprehensively managed portfolios diversified to align with your retirement horizon

Tailored to retirement

Each fund's target date reflects when investors are expected to retire and determines the portfolio's asset allocation.

Unique glide path

Allocations are structured to pursue performance and downside protection near retirement with tactical implementation and security selection by Putnam's Global Asset Allocation team.

Includes Absolute Return

Allocations to alternative strategies enhance diversification and emphasize a low-volatility approach.

Each RetirementReady Fund has a different target date indicating when the fund's investors expect to retire and begin withdrawing assets from their account. The dates range from 2020 to 2060 in five-year intervals. The funds are generally weighted more heavily toward more aggressive, higher-risk investments when the target date of the fund is far off, and more conservative, lower-risk investments when the target date of the fund is near. This means that both the risk of your investment and your potential return are reduced as the target date of the particular fund approaches, although there can be no assurance that any one fund will have less risk or more reward than any other fund. The principal value of the fund is not guaranteed at any time, including the target date.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com

Not all share classes available on all platforms.

Annualized return performance at net asset value and expense ratios

Class Y	Inception	1 year	3 years	5 years	10 years	Life of fund	Total expense ratio	What you pay*

* "What you pay" reflects Putnam Management's decision to contractually limit expenses through 11/30/27 for the 2060 Fund and 11/30/18 for all other funds.

The RetirementReady Custom Benchmarks are unmanaged indexes administered by Putnam Management, consisting of various indexes that follow the underlying strategies of the portfolios.

The S&P 500 Index is an unmanaged index of common stock performance. The Bloomberg (BBG) Barclays U.S. Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities. You cannot invest directly in an index.

The principal value of the funds is not guaranteed at any time, including the target date.

Consider these risks before investing: Our allocation of assets among permitted asset categories may hurt performance. Stock and bond prices may fall or fail to rise over time for several reasons, including general financial market conditions (including, in the case of bonds, perceptions about the risk of default and expectations about changes in monetary policy or interest rates), changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the funds' portfolio holdings. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Default risk is generally higher for non-qualified mortgages. Interest-rate risk is greater for longer-term bonds, and credit risk is greater for below-investment-grade bonds. Lower-rated bonds may offer higher yields in return for more risk. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk and the risk that they may increase in value less when interest rates decline and decline in value more when interest rates rise. International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Active trading strategies may lose money or not earn a return sufficient to cover trading and other costs. REITs are subject to the risk of economic downturns that have an adverse impact on real estate markets. Commodity-linked notes are subject to the same risks as commodities, such as weather, disease, political, tax and other regulatory developments, and other factors affecting the value of commodities. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Efforts to produce lower-volatility returns may not be successful and may make it more difficult at times for the funds to achieve their targeted returns. In addition, under certain market conditions, the funds may accept greater volatility than would typically be the case, in order to seek their targeted return. There is no guarantee that the funds will provide adequate income at and through an investor's retirement. You can lose money by investing in the funds. **For the portion invested in the Putnam Government Money Market Fund, these risks also apply:** *Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.*
