# Putnam Low Volatility Equity Fund

Pursuing returns comparable to the U.S. stock market, but with lower volatility over a market cycle

**Low-beta stocks**

The fund invests in low-beta stocks, which have historically provided better risk-adjusted returns than the overall stock market.

**Sector diversity**

The fund seeks to capitalize on a diverse range of low-beta stocks across all sectors rather than simply overweighting low-beta sectors.

**Option strategies**

The veteran management team employs options strategies that can improve performance and reduce risk.

**Fundamental investment research determines top holdings and sector weightings**

**Growth of a \$10,000 investment**

The fund has returned an average of 6.5% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com.

S&P 500 Index is an unmanaged index of common stock performance. You cannot invest directly in an index.

**Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility; a beta of more than 1.0, higher volatility than the benchmark. **Sharperatio** is a measure of historical adjusted performance calculated by dividing the fund's return minus the risk free rate (ML 3mth T-Bill) by the standard deviation of the fund's return. The higher the ratio, the better the fund's return per unit of risk. The **price-earningsratio** of a firm's common stock is calculated as the current stock price divided by projected earnings per share for the coming year. The projections used are based on street consensus estimates provided by IBES. **Earnings per share** (EPS) is found by taking the net income and dividing it by the basic or diluted number of shares outstanding, as reported. You can also take "expected" earnings for the current year or for future years to calculate other P/E ratios. **Standard deviation** measures how widely a set of values varies from the mean. It is a historical measure of the variability of return earned by an investment portfolio. For fixed income and equity funds, risk statistics are measured using a 3 and 5-year regression analysis respectively. For funds with shorter track records, Since Inception analysis is used.

Not all share classes are available on all platforms.

**Consider these risks before investing:** Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions and factors related to a specific company, issuer or sector. There may be times when stocks in the fund's portfolio exhibit higher volatility than we expect, are not correlated with market movements as we expect, or underperform the markets. By selling covered call options, the fund limits its opportunity to profit from an increase in the price of the underlying portfolio securities, but continues to bear the risk of a decline in the value of these securities. The fund also risks losing all or part of the cash paid for purchasing put options. You can lose money by investing in the fund.

**Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.**
