Putnam Government Money Market Fund

Pursuing income while preserving capital with the highest-quality short-term investments

Capital preservation

The fund invests at least 99.5% of its total assets in cash, U.S. government securities, and repurchase agreements fully collateralized by U.S. government securities or cash.

A high-quality portfolio

The fund invests in high-quality debt securities that are obligations of the U.S. government and its agencies and instrumentalities.

Leading research

The fund's veteran portfolio managers, supported by Putnam's fixed-income research division, manage risk by analyzing individual securities and overall market conditions.

Money market fund types

	Prime institutional	Retail	Government (retail or institutional)
Definition	Institutional investors	Beneficial owners limited to "natural persons"	99.5% invested in cash, government securities, 100% government-collateralized repo
Net asset value	Floating	Stable (e.g., \$1.00)	Stable (e.g., \$1.00)
Liquidity fees	Based on weekly liquid assets: If <30%, max 2% fee at board discretion If <10%, 1% fee required, unless board removes or increases up to 2%	Based on weekly liquid assets: If <30%, max 2% fee at board discretion If <10%, 1% fee required, unless board removes or increases up to 2%	May opt in with prior prospectus disclosure
Redemption gates	Based on weekly liquid assets: If <30%, board may suspend up to 10 days	Based on weekly liquid assets: If <30%, board may suspend up to 10 days	May opt in with prior prospectus disclosure

All funds are required to comply with new disclosure and reporting, diversification, and stress-testing requirements.

The fund may be attractive to

- Retail and institutional investors, as well as defined contribution plans
- Investors who are in or near retirement and are seeking capital preservation and monthly income distributions
- Investors with short investment time horizons who may benefit from the fund's check-writing feature and goal of maintaining liquidity in the form of a stable \$1.00 NAV

A convenient option

- No up-front sales charge
 - No liquidity fees or redemption gates
 - No minimum holding period*
 - Check-writing feature
- * If an exchange is made from an existing Putnam fund that is currently under a 12-month CDSC period into Putnam Government Money Market Fund, and liquidation takes place, then a possible 1% redemption fee may apply.

1 year	1.55%	1.48%
Life of fund	0.70	0.65

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class A shares assumes reinvestment of distributions and does not account for taxes. For the most recent month-end performance, please visit putnam.com.

The Lipper U.S. Government Money Market Funds Average is an arithmetic average of the total return of all Lipper U.S. Government Money Market Funds. You cannot invest directly in an index.

Lipper rankings for class A shares are based on total return without sales charge relative to all shares classes of funds with similar objectives as determined by Lipper.

Weighted average maturity is a dollar-weighted average measure of the maturity of a fund's portfolio securities, which takes into account maturity-shortening provisions, such as the date of an instrument's next interest-rate reset date and/or tender dates.

Not all share classes are available on all platforms.

Consider these risks before investing: *You can lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time. The values of money market investments usually rise and fall in response to changes in interest rates. Interest rate risk is generally lowest for investments with short maturities (a significant part of the fund's investments). Changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of issuer, and changes in general economic or political conditions can increase the risk of default by an issuer or counterparty, which can affect a security's or instrument's credit quality or value.*

Certain securities in which the fund may invest, including securities issued by certain U.S. government agencies and U.S. government sponsored enterprises, are not guaranteed by the U.S. government or supported by the full faith and credit of the United States. Mortgage-backed investments carry the risk that they may increase in value less when interest rates decline and decline in value more when interest rates rise. We may have to invest the proceeds from prepaid investments, including mortgage- and asset-backed investments, in other investments with less attractive terms and yields.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
