# Putnam Master Intermediate Income Trust

**Objective**

The fund seeks, with equal emphasis, high current income and relative stability of net asset value. It allocates assets to the U.S. investment-grade sector, high-yield sector, and international sector.

**Portfolio quality**

|               |       |
|---------------|-------|
| AAA           | 15.7% |
| AA            | 2.0   |
| A             | 2.7   |
| BBB           | 9.3   |
| BB            | 19.7  |
| B             | 7.8   |
| CCC and below | 4.6   |
| Not rated     | 12.6  |
| Net cash      | 25.5  |

**Maturity breakdown**

|                |       |
|----------------|-------|
| 0 to 1 year    | -1.5% |
| 1 to 5 years   | 67.0  |
| 5 to 10 years  | 34.1  |
| 10 to 15 years | 0.7   |
| Over 15 years  | -0.2  |

Holdings represent 100% of the portfolio and will vary over time.

Negative weights may result from timing differences between trade and settlement dates of securities, such as TBAs, or by the use of derivatives.

**Portfolio composition**

|                                  |       |
|----------------------------------|-------|
| Agency pass-through              | 26.2% |
| High-yield corporate bonds       | 19.1  |
| Agency CMO                       | 14.0  |
| Residential MBS (non-agency)     | 13.0  |
| Emerging market bonds            | 12.1  |
| Commercial MBS                   | 8.0   |
| Bank loans                       | 5.8   |
| Investment-grade corporate bonds | 5.6   |
| Convertible securities           | 3.0   |
| Asset-backed securities (ABS)    | 0.8   |
| Net cash                         | 25.5  |

Fund allocations may not total 100% of net assets because the table includes the notional value of the derivatives (the economic value for purposes of calculating periodic payment obligations), in addition to the market value of securities.

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher is considered investment grade. This table reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings and portfolio credit quality will vary over time. Net cash represents the market value weights of cash, derivatives, and short-term securities in the portfolio. **The fund itself has not been rated by an independent rating agency.**

Morningstar rankings display the fund's actual rank within its Morningstar category based on average annual total return and number of funds in that category. Morningstar rankings may differ significantly from Morningstar's risk-adjusted star ratings. Past performance is not indicative of future results.

**Average effective maturity** depends on the maturity of the underlying bonds within each fund. The longer the maturity, the greater the interest-rate risk.

**Average effective duration** provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates.

**Consider these risks before investing:** Emerging market securities carry illiquidity and volatility risks. Lower-rated bonds may offer higher yields in return for more risk. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments).

Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds. Unlike bonds, funds that invest in bonds have fees and expenses. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions or geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. Bond investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk and the risk that they may increase in value less when interest rates decline and decline in value more when interest rates rise. The fund's investments in mortgage-backed securities and asset-backed securities, and in certain other securities and derivatives, may be or become illiquid. The fund's concentration in an industry group comprising privately issued residential and commercial mortgage-backed securities and mortgage-backed securities issued or guaranteed by the U.S. government or its agencies or instrumentalities may make the fund's net asset value more susceptible to economic, market, political, and other developments affecting the housing or real estate markets and the servicing of mortgage loans secured by real estate properties. The fund currently has significant investment exposure to commercial mortgage-backed securities, which, during periods of difficult economic conditions, may experience an increase in delinquencies and losses as a result of the effects of those conditions on commercial real estate markets, the ability of commercial tenants to make loan payments, and the ability of a property to attract and retain commercial tenants. International investing involves currency, economic, and political risks. The fund's shares trade on a stock exchange at market prices, which may be lower than the fund's net asset value.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund. You can lose money by investing in the fund.
