Putnam Global Financials Fund

Pursuing investment opportunities in financial-related companies worldwide

A dynamic sector

From banking and insurance to real estate, the fund invests in industries that can profit from the global demand for financial services.

A global approach

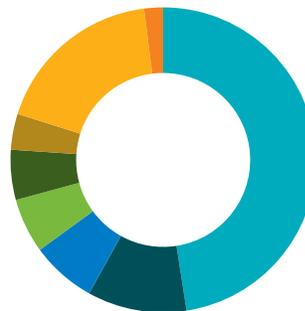

To seek the best opportunities, the fund's manager has the flexibility to invest in stocks from around the world.

Active management

The manager, supported by experienced research analysts, combines rigorous fundamental research with macroeconomic views to pinpoint opportunities across the sector.

Diversification across markets

United States	47.5%
United Kingdom	10.5
Japan	6.9
Australia	5.8
France	5.3
Ireland	3.8
Other countries	18.1
Cash and net other assets	2.0

Allocations will vary over time. Due to rounding, percentages may not equal 100%

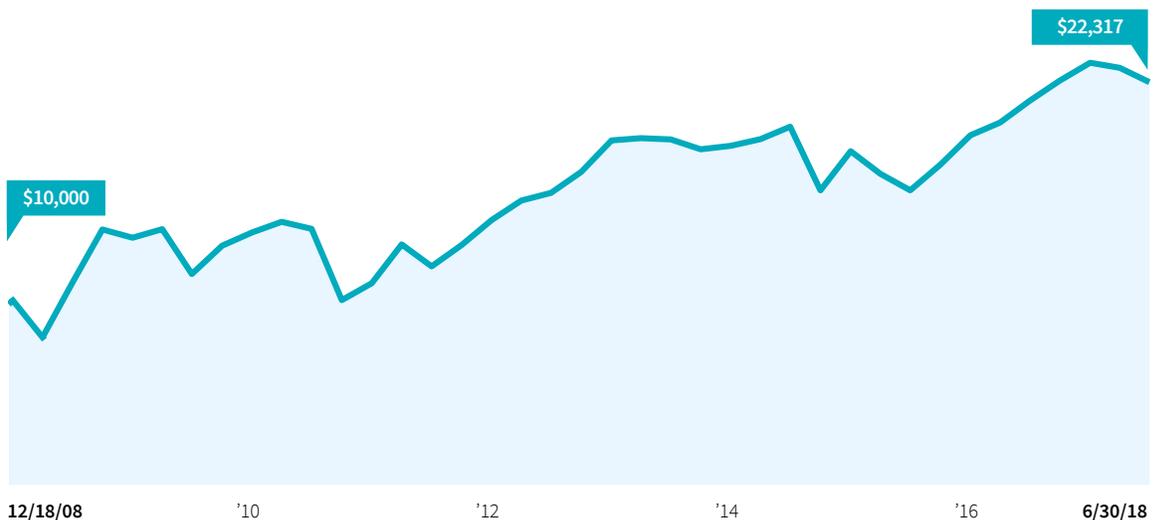

Top ten holdings

Bank of America	4.73%
Citigroup	4.27
Assured Guaranty	4.18
Prudential	3.96
KKR	3.92
AIA Group	3.64
Goldman Sachs	3.24
Insurance Australia Group	3.06
E*Trade Financial	3.00
Challenger Financial Service	2.77

Holdings represent 36.77% of the portfolio and will vary over time.

Growth of a \$10,000 investment

The fund has returned an average of 8.8% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com.

The MSCI World Financials Index (ND) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets in the financials sector. You cannot invest directly in an index.

Beta is defined as a fund's sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, Since Inception analysis is used.

Not all share classes are available on all platforms.

Consider these risks before investing: International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Financial services companies may be affected by the availability and cost of capital; changes in interest rates, insurance claims activity, industry consolidation, and general economic conditions; and reduced profitability from limitations on loans, proprietary trading, and interest rates and fees charged as a result of extensive government regulations. The fund's policy of concentrating on a limited group of industries can increase the fund's vulnerability to adverse developments affecting a single industry or issuer, which may result in greater losses and volatility. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. The use of short selling may result in losses if the securities appreciate in value. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions, changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. You can lose money by investing in the fund.

Request a prospectus or a summary prospectus, if available, from your financial representative or by calling Putnam at 1-800-225-1581. These prospectuses include investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing.
