# Putnam Global Industrials Fund

Pursuing investment opportunities in industrial products, services, and equipment companies worldwide

**A dynamic sector**

From aerospace and trucking to infrastructure, the fund invests in industries that can profit from the global demand for industrial products and services.

**A global approach**

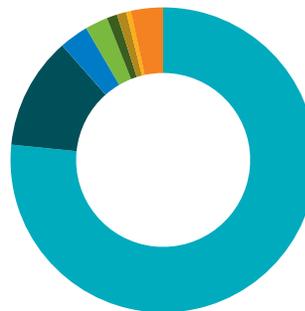

To seek the best opportunities, the fund's manager has the flexibility to invest in stocks from around the world.

**Active management**

The manager, supported by experienced research analysts, combines rigorous fundamental research with macroeconomic views to pinpoint opportunities across the sector.

**Diversification across markets**

|                           |       |
|---------------------------|-------|
| United States             | 76.6% |
| Japan                     | 11.9  |
| France                    | 3.1   |
| United Kingdom            | 2.4   |
| Germany                   | 1.1   |

| Fortive                 | 4.55  |
| Waste Connections       | 4.55  |

Holdings represent 54.76% of the portfolio and will vary over time.

**Growth of a \$10,000 investment**

The fund has returned an average of 15.9% annually since inception.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class Y shares assumes reinvestment of distributions and does not account for taxes. Class Y shares, available to investors through an asset-based fee program or for institutional clients, are sold without an initial sales charge and have no CDSC. For the most recent month-end performance, please visit putnam.com.

**Not FDIC insured  
May lose value  
No bank guarantee**

**Expense ratio**

(Y shares)

Total expense ratio  
1.28%What you pay  
1.03%

"What you pay" reflects Putnam Management's decision to contractually limit expenses through 12/30/18.

**Market-cap breakdown**

|                       |        |
|-----------------------|--------|
| Over \$69B            | 32.31% |
| \$16B-\$69B           | 60.49% |
| \$3.4B-\$16B          | 4.00%  |
| \$1B-\$3.4B           | 0.00%  |
| Less than \$1B        | 0.00%  |
| Cash and other assets | 3.21%  |

"Cash and other assets" includes cash, short-term securities, ETFs, bonds excluding convertible bonds, and other securities not able to be classified by market capitalization.

\*Based on annualized returns for quarterly rolling periods.

The MSCI World Industrials Index (ND) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets in the industrials sector. You cannot invest directly in an index.

**Beta** is defined as a fund's sensitivity to market movements and is used to evaluate market related, or systematic, risk. It is a historical measure of the variability of return earned by an investment portfolio. Risk statistics are measured using a 5-year regression analysis. For funds with shorter track records, Since Inception analysis is used.

Not all share classes are available on all platforms.

**Consider these risks before investing:** International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Industrial products, services, and equipment industries may be affected by economic trends, commodity prices, technological obsolescence, labor relations, legislation, worldwide competition, and liability for environmental damage. The fund's policy of concentrating on a limited group of industries and the fund's "non-diversified" status, which means the fund may invest a greater percentage of its assets in fewer issuers than a "diversified fund," can increase the fund's vulnerability to adverse developments affecting a single industry or issuer, which may result in greater losses and volatility. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. The use of short selling may result in losses if the securities appreciate in value. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions, changes in government intervention in financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. You can lose money by investing in the fund.
