**Maturity breakdown**

Less than 60 days	31.2%
2-6 months	13.8%
6 months-1 year	12.1%
1-2 years	21.6%
2-3 years	19.0%
Over 3 years	2.3%

Holdings represent 100% of the portfolio and will vary over time.

**A cost-conscious and convenient option**

- No up-front sales charge
- No redemption fees
- No minimum holding period

If an exchange is made from an existing Putnam fund that is currently under a 12-month CDSC period into Putnam Short Duration Income Fund, and liquidation takes place, then a possible 1% redemption fee may apply.

**Not FDIC insured**  
**May lose value**  
**No bank guarantee**

# Putnam Short Duration Income Fund

Seeking capital preservation and a higher rate of current income

**A broader opportunity set**

The fund invests in a diversified portfolio composed of short duration, investment-grade money market and other fixed-income securities.

**Active risk management**

In today's complex bond market, the fund's experienced managers actively manage risk with the goal of superior risk-adjusted performance over time.

**Higher income potential**

Access to a wider range of income opportunities means the fund may offer higher income potential than other short-term investments.

**Portfolio quality**

A-1+	1.3%
A-1	4.7
A-2	27.2
A-3	3.3
AAA	6.7
AA	18.2
A	29.8
BBB	8.5
Not rated	0.6
Net cash	-0.4

Holdings represent 100% of the portfolio and will vary over time.

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher (A-3/SP-3 or higher, for short-term debt) is considered investment grade. This chart reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings may vary over time. Net cash, if any, represents the market value weights of cash and derivatives and may show a negative market value as a result of the timing of trade versus settlement date transactions. **The fund itself has not been rated by an independent rating agency.**

**Daily net asset value**

**Standard deviation** measures how widely a set of values varies from the mean. It is a historical measure of the variability of return earned by an investment portfolio. **Average effective maturity** depends on the maturity of the underlying bonds within each fund. The longer the maturity, the greater the interest-rate risk. **Average effective duration** provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **3-year average duration** is an arithmetic average of month-end values over the previous 3-year period.

For informational purposes only. Not an investment recommendation.

**Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class N shares assumes reinvestment of distributions and does not account for taxes. After sales charge returns reflect a maximum 1.50% load. Performance for class N shares prior to their inception is derived from the historical performance of class A shares, adjusted for the applicable sales charge and the higher operating expenses of class N shares. For the most recent month-end performance, please visit putnam.com.**

The ICE BofAML U.S. Treasury Bill Index is an unmanaged index that tracks the performance of U.S.-dollar-denominated U.S. Treasury bills publicly issued in the U.S. domestic market. Qualifying securities must have a remaining term of at least one month to final maturity and a minimum amount outstanding of \$1 billion. ICE Data Indices, LLC (ICE BofAML), used with permission. ICE BofAML permits use of the ICE BofAML indices and related data on an "as is" basis; makes no warranties regarding same; does not guarantee the suitability, quality, accuracy, timeliness, and/or completeness of the ICE BofAML indices or any data included in, related to, or derived therefrom; assumes no liability in connection with the use of the foregoing; and does not sponsor, endorse, or recommend Putnam Investments, or any of its products or services. You cannot invest directly in an index.

Not all share classes are available on all platforms.

**Consider these risks before investing:** Putnam Short Duration Income Fund is not a money market fund. The effects of inflation may erode the value of your investment over time. Funds that invest in government securities are not guaranteed. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including mortgage-backed investments, in other investments with less attractive terms and yields. Bond prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions (including perceptions about the risk of default and expectations about monetary policy and interest rates), changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These factors may also lead to periods of increased volatility and reduced liquidity in the fund's portfolio holdings. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds. Credit risk is generally greater for debt not backed by the full faith and credit of the U.S. government. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Unlike bonds, funds that invest in bonds have fees and expenses. You can lose money by investing in the fund.
