

Invest early and put time on your side

Start saving early and stick with your plan. It's a time-tested strategy for investors seeking to build wealth. A head start of just a few years can make a big difference, thanks to the power of compounding returns. Staying invested can offer even more growth potential.

The power of time and discipline

This example assumes an 8% annual rate of return. This illustration is intended solely to demonstrate the comparative effect of compounding on current versus delayed investments. It does not reflect the actual return on investment, which will fluctuate with market conditions. Regular investing does not guarantee a profit or protect against loss in declining markets. Withdrawals from an IRA may be subject to income taxes and certain penalties. All funds involve risk, including the loss of principal.
