Allocations will vary over time. Due to rounding, percentages may not equal 100%.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. For the most recent month-end performance, please visit putnam.com. Class Y shares before their inception are derived from the historical performance of the fund's class A shares, which have not been adjusted for the lower expenses; had they, returns would have been higher. For a portion of the periods, these funds may have had expense limitations, without which returns would have been lower. Class Y shares are generally only available for corporate and institutional clients and have no initial sales charge.

*“What you pay” reflects Putnam Management’s decision to contractually limit expenses through 12/30/19 (Emerging Markets Equity), 1/30/20 (International Growth Fund), and 2/28/19 (Global Sector). To obtain the most recent month-end performance, visit putnam.com.

Lipper rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Lipper.

Information ratio measures a fund’s risk-adjusted return relative to the fund’s benchmark. The higher the information ratio, the higher the active return of the portfolio given the amount of risk taken.

Putnam Government Money Market Fund	0.5%

* Assets are allocated in approximately the same proportions as sector weightings in the MSCI World Index. The fund is rebalanced quarterly to remain in alignment with this benchmark.

For informational purposes only. Not an investment recommendation.

Consider these risks before investing: International investing involves currency, economic, and political risks. Emerging-market securities carry illiquidity and volatility risks. Investments in small and/or midsize companies increase the risk of greater price fluctuations. Growth stocks may be more susceptible to earnings disappointments, and value stocks may fail to rebound. The use of short selling may result in losses if the securities appreciate in value. Risks associated with derivatives include increased investment exposure (which may be considered leverage) and, in the case of over-the-counter instruments, the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Stock prices may fall or fail to rise over time for several reasons, including general financial market conditions, changing market perceptions, changes in government intervention in the financial markets, and factors related to a specific issuer or industry. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. You can lose money by investing in the fund.

Your clients should carefully consider the investment objectives, risks, charges, and expenses of a fund before investing. For a prospectus, or a summary prospectus if available, containing this and other information for any Putnam fund or product, call the Putnam Client Engagement Center at 1-800-354-4000. Your clients should read the prospectus carefully before investing.
