Credit qualities are shown as a percentage of net assets. A bond rated BBB or higher (A-3 or higher, for short-term debt) is considered investment grade. This chart reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Short-term cash bonds rated A-1+ are included in the AAA-rating category. Ratings and portfolio credit quality will vary over time. The fund itself has not been rated by an independent rating agency.

\*\*Total Cash shown within the Duration, Maturity, Sector & Quality distributions reflects the cash position outside of the wrap plus any cash held within the wrap and may include an offset for the notional values of certain derivatives.

Commercial MBS totals include the notional values of CMBX positions, which are shown in the not rated category. The securities held within the underlying CMBX indices as of the date shown in the breakdown were A rated and BBB-.

**Consider these risks before investing:** The fund seeks capital preservation, but there can be no assurances that it will achieve this goal. The fund's returns will fluctuate with interest rates and market conditions. The fund is not insured or guaranteed by any governmental agency. Funds that invest in bonds are subject to certain risks including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short term bonds. Unlike bonds, bond funds have ongoing fees and expenses.

Lower-rated bonds may offer higher yields in return for more risk. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. The use of derivatives involves additional risks, such as the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. The fund may be exposed to risks associated with the providers of any wrap contracts (synthetic GICs) covering with the fund's assets, including credit risk and capacity risk.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.

#### **Average Effective Duration**

Average effective duration provides a measure of a fund's interest-rate sensitivity. In general, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. The relationship among funds with different durations is straightforward: A fund with duration of 10 years is expected to be twice as volatile as a fund with a five-year duration. Duration also gives an indication of how a fund's net asset value (NAV) will change as interest rates change. A fund with a five-year duration would be expected to lose 5% of its NAV if interest rates rose by 1 percentage point, or gain 5% if interest rates fell by 1 percentage point.

#### **Weighted Average Maturity**

Weighted average maturity is a calculation of the average time that securities in a fixed-income fund will come due. Average maturity takes into account mortgage payments in mortgage-backed securities, adjustable coupons on bonds, and puts. Call provisions are not included.

#### **Crediting Rate**

The weighted average net interest rate of all of the fund's investments (including cash) as of period end. The gross rate is quoted net of wrap fees but gross of investment management fees.

The fund is a collective trust managed and distributed by Putnam Fiduciary Trust Company, LLC ("PFTC"), a non-depository New Hampshire trust company. However, it is not FDIC insured; is not a deposit or other obligation of, and is not guaranteed by, PFTC or any of its affiliates. The fund is not a mutual fund registered under the Investment Company Act of 1940, and its units are not registered under the Securities Act of 1933. The fund is only available for investment by eligible, qualified retirement plan trusts, as defined in the declaration of trust and participation agreement.
