The Putnam Social Advisor Survey of 1,021 U.S. financial advisors currently advising retail clients and have been doing so for more than two years, was conducted online November 28, 2018, through December 24, 2018, in partnership with NMG consulting. This is the sixth annual iteration of the survey.

FOR INFORMATIONAL PURPOSES ONLY. NOT INTENDED AS INVESTMENT ADVICE.

Putnam Retail Management
4/19
Key findings

The Environment

From the periphery barely five years ago, social media has evolved into a critical tool for business development and client service for almost all wealth management advisors. Advisors today are seeing more and more success from their social media initiatives and are more confident in and enthusiastic about social media than ever before:

• More than nine advisors in ten (92%) who use social media for business (83% of all advisors) say social media has helped them gain new clients, up from 86% last year

• Average new AUM resulting from social media initiatives is $4.9 million, including $1.4 million in the past 12 months

• The median age of a new client gained through social media jumped to 40 from 35 last year as social media matures beyond its youthful origins and develops traction with older (and potentially higher asset) prospects

• Almost half of advisors (48%) agree strongly that social media has changed the nature of their relationship with clients, up from 39% last year. Another 43% agree somewhat.

• The changes are all positive, and several are picking up steam. More than two thirds (67%) say they have more frequent communication with clients as a result of social media (up from 59%), and nearly six in ten (57%) say decision-making is faster and easier (up from 50%)
Key findings

The Environment

• Advisors are getting more comfortable with their fluency in social media, with fully 61% describing themselves as expert, up from an improbably high of 46% just last year

• Advisors are having modestly greater success leveraging referrals using social media; almost half (47%) use social media a great deal to connect with clients’ heirs and adult children (up three points). Almost six in ten (57%) use social media a great deal to make initial contact with referrals from existing clients, up five points

• More than six advisors in ten (61%) consider social media more efficient than traditional business development initiatives, about the same as last year

• Nearly nine advisors in ten (86%) say social media plays a significant role in their marketing efforts, with the proportion saying “a very significant role” leaping to 47% from 34% last year. As recently as 2014, fewer than a quarter of advisors (23%) took this position
Key findings

The Networks

• While the proportion of advisors using LinkedIn for business flatlined in the low 70s beginning in 2015, business use of other networks (especially Facebook and Twitter) continues to grow apace.

• The share of advisors designating Facebook their primary social media network for business declined sharply (to 30% from 36%) this year after years of steady growth. LinkedIn is essentially unchanged at 52% (and virtually unchanged since 2014). Qualitative responses point to security and data policy issues as a potential cause of Facebook’s decline.

• Frequency of business use of all networks tested is up marginally over last year, but LinkedIn is up more.

• An increasing number of advisors have an appetite for using YouTube, Instagram, and Snapchat; interest in Facebook, LinkedIn, and Twitter hasn’t changed appreciably.

• LinkedIn continues to be seen as the site to “improve my referral network” (on which Facebook tanked this year, down seven points).

• Facebook is seen as excelling in enhancing current client relationships.
Key findings

The Networks

• The trend profile for LinkedIn is impressively positive:
  – In terms of use for business purposes, LinkedIn is clocking solid, sustained growth in many areas, especially advisors using the network to follow companies; like, comment on or share others’ LinkedIn updates; requesting recommendations and posting to groups or pages
  – The share of advisors who use LinkedIn only passively has declined steadily since 2014 to 20% (from 33%)
  – The use of LinkedIn for most business development initiatives is up over last year, especially connecting with other financial professionals; enhancing current client relationships; expanding advisors’ professional knowledge and cultivating prospective clients

• The trend profile for Facebook is unremarkable:
  – In terms of use for business purposes, Facebook is relatively flat. Exceptions are solid growth in liking, commenting on or sharing content, and on posting personal content
  – The share of advisors who use Facebook only passively has declined modestly since 2015 to 15% (from 23%)
  – The use of Facebook for most business development initiatives is virtually unchanged since last year with the exception of expanding advisors’ knowledge, up strongly

• The use of Twitter for most business development initiatives is up compared to last year, most conspicuously on “promoting myself as a thought leader” (up 25 points!)
Key findings

The Networks

• The credibility of LinkedIn as a source of information is growing faster than the credibility of Facebook. The share of advisors who consider LinkedIn more relevant than traditional media increased 10 points, to 52%, over last year. Facebook crept up only four points, to 48%

• Many more advisors increased their use of LinkedIn for business purposes this year than last (57%, up from 47%); Facebook is unchanged at 60%, and Twitter is essentially flat at 47%

• LinkedIn and Facebook share honors for being used because they deliver attractive prospects, clients, and results. Other networks are far behind
Key findings

The Winners

What types of advisors are getting the greatest lift out of social media? Of the 14% of advisors who have used social media to grow AUM by 10% or more (our highest category):

• Three quarters are male (versus 68% of all advisors)
• Almost half (46%) are between 30 and 39 (versus 35% for all advisors)
• Nearly six in ten (58%) say social media plays a very significant role in their practice (versus 47%)
• They are much likelier to pay for enhanced services from a social media network (80% versus 62%)
• They are likelier to have been trained on social media by colleagues from their firms or offices (50% versus 39%) or by a wholesaler or representative from an investment partner firm (42% versus 37%)
• Their next big move is to integrate social media data into their CRM systems (57% versus 45%)
• Their average AUM gained through social media is about three times the average for all advisors ($15.3 million versus $4.9 million)
Key findings

The Details

In the familiar but still important category, the profile of advisors in Social Media 6 generally resembles advisor profiles in earlier social media studies:

• 68% male; 32% female

• Average age of 43.7; in practice an average of 11 years

• Distributed across the advisory channel, predominantly in financial planning companies, banks, wirehouses, insurance companies, and regional BDs

• Stubbornly high proportion of transactional business (46% versus 54% fee), virtually unchanged since 2015

• Net business use of social media (83%) virtually unchanged since 2015 — higher, but only somewhat higher, among younger advisors
Key findings

What’s Next?

Among advisors already using social media for business:

• Going deeper with existing social media presences (60%)
• Integrating social media data into marketing automation system (53%)
• Adding staff dedicated to social media (47%)
• Integrating social media into CRM (45%)

Among advisors not currently using social media for business:

• Big increase (to 28%) saying they are “absolutely certain” to start using social media for business in the next three years (response to this question in four previous cycles was in the single digits)

Primary social media network for business

LinkedIn: 52%  
Facebook: 30%  
Twitter: 7%  
Instagram: 5%  
YouTube: 4%  
Snapchat: 1%

Note: Base: Social media networks used for business (83%).
Q15 Which, of these do you consider your primary social media network for business use?
Reasons this network is primary for business — verbatims

LinkedIn

• “It’s a more professional network of business minded clients and individuals that are looking for the type of services my company and I offer.” (Male, 38, Independent, $100M–$149.9M AUM)

• “Not only are my clients here, but some of my biggest mentors are located here too. It is also just a more professional locale than a site like, for instance, Snapchat.” (Male, 44, Wirehouse, $25M–$49.9M AUM)

• “LinkedIn provides access to the widest net of like-minded individuals that fit well with our industry.” (Male, 36, $50M–$99.9M AUM)

• “It seems to be the culturally accepted standard.” (Male, 37, Independent, $150M–$200M AUM)

Facebook

• “Facebook is the most widely used social media platform and it is where I have the most access to my current and future clients.” (Female, 27, National Full Service, $50M–$99.9M AUM)

• “I have a lot more connections on Facebook. The platform is easier for many people to follow at once. I feel like you have a lot more options when it comes to picking what you want to share and post.” (Male, 33, Bank, $200M+ AUM)

• “Facebook has more people like my clients than like my competition. LinkedIn, for example, is a lot of people just like me looking at other people just like them.” (Male, 65, Independent, $50M–$99.9M AUM)

Q17 Are there any other reasons (primary from Q15) is your primary network?
Which sites?

Reasons this network is primary for business – verbatims

Twitter

• “Super convenient — It’s available on phone, tablet, and computer. Also, it’s very easy to customize.” (Female, 60, $50M–$99.9M AUM)

• “The BEST way to communicate quickly to business associates and friends.” (Male, 40, Wirehouse, $150M–$200M AUM)

Instagram

• “People are moving away from Facebook because of all the security problems and moving to Instagram.” (Female, 65)

• “It is trending better than most social networks for business right now (in my opinion).” (Male, 30, Independent, $150M–$200M AUM)

YouTube

• “Being able to get the information you want out in a personal fashion. You can show emotion and attitude when presenting content.” (Male, 38, Bank, $50M–$99.9M AUM)

• “Short videos allows to be very explicit with our clients and can be played when needed.” (Male, 67)

Snapchat

• “I just love the creativity they have.” (Male, 30, Regional BD, $100M–$150M AUM)

</tr>
</tbody>
</table>

Note: Base: This social media network used for business and direction is increasing.

Q25 Which, if any, of the following reasons describe why your usage of this social network for business purposes has increased over the past year? Please select the items that apply to each network (column).
For what?

**Needed to better leverage social media — verbatims**

- “*I would like it if LinkedIn had a one-button signup for a newsletter, built in CRM capabilities for sending emails or if it allowed for live private chats with my clients or prospective ones. It may have these features now and if so they really need to do a better job of educating us. I don’t have the time to learn new tech and new features so it is vitally important that social networks make new features idiot-proof.*” (Female, 51, $200M+ AUM)

- “*It is complicated to get information approved by compliance therefore it is hard to keep a social media presence. However if there was access to pre-approved newsletters/articles that would be very helpful.*” (Female, 36, Independent, $$100M–$150M AUM)

- “*More training on how the platform works as it is constantly changing. Tutorials would be great! The more people understand a product, the more that they will use it.*” (Female, 56, $200M+ AUM)

- “*They should provide better analytics and reporting tools, as well as better tutorials on how to use analytics and reports to find more clients and improve your ROI.*” (Male, 40, $25–$49.9M AUM)

- “*Teach us how to segment and focus our social media accounts towards certain demographics.*” (Male, 32, Insurance, $150M–$200M AUM)

- “*A way of targeting people in my geographic area that have been seeking financial information or news.*” (Male, 35, Wire, $0–$25M AUM)

Q51 What could your firm, or perhaps social networks themselves provide (features, products, tools, education, training, etc.) to help you better use social media in your business?

  - Some but not a great deal: 39%
  - Not very much or not at all: 5%

Note: Base: Used social media networks for business and has helped gain clients (76%); starting in 2018 question expanded to additional networks beyond LinkedIn, Facebook, and Twitter used for business.

Q38 Compared with traditional networking activities such as participating in civic organizations or attending events, how would you best describe how social media has improved your efficiency?
Is social media working for advisors? Where is it going?

Success stories shortening sales cycle — verbatims

• “In August after I posted an article on LinkedIn a prospect direct messaged me and we talked back and forth for a few days about where he was financially and where he wanted to be by the time he retired. We set up an appointment within a few days and he said he felt like he knew me already and was comfortable discussing his goals and risk tolerance right off the bat. I took over as his financial planner and added over $500k to my book of business.” (Female, 51, $200M+ AUM)

• “I had a client who had a death in the family and inherited a large amount of money. A friend recommended that she contact me and shared my contact info on Facebook. We met a few days later and before she finalized the paperwork for the inheritance I was able to advise her and took her on as a client. It was less than a week.” (Female, 37, National Full Service, $50M–$99.9M AUM)

• “Retained a new client via social media due to shared content from a current client. I received a warm request for information, which led to a meeting and bringing on a client. Normal process would have taken 7–8 months; with the help of social media this was accomplished within 3 months.” (Male, 43, National Full Service, $0–$25M AUM)

• “Another client thanked me for my services on their own Facebook page and tagged me in it. I replied and one of their Facebook friends also replied in less than an hour and asked if they could contact me via private message. The rest is history.” (Female, 53, $150M–$200M, AUM)

Q41 Please share an example of an instance when you quickly added a new client to your book in a shortened period of time due to your use of social media:

Q29 When compared with traditional media sources do you consider the information you generally find through each of the following social media networks as having more/less/the same amount of relevance?
Is social media working for advisors? Where is it going?

Success stories from using social media for business — verbatims

• “I have a client I have been taking care of for over 20 years. Even though he is an older gentleman he is extremely tech savvy. Only recently did he inform me he is on LinkedIn, although that in and of itself was no big surprise. He added me to his network and we started having more conversations and communications. In other words it increased the relationship in a different way. I’m not sure exactly how it came about — I don’t know all the ins and outs of LinkedIn and how its algorithms work but shortly thereafter I was contacted by one of my customer’s contacts. He asked me (but not specifically) what I was doing for my customer. I told him generally and for how long. We had several communications and shortly after that I had a new high net worth client.”
(Male, 56, $100M–$150M AUM)

• “I had been promoting my business on Instagram for quite a while now and a woman had actually reached out to me over ‘DM’ to discuss her inheritance from her late parents. It turns out she had gotten over $300,000 in funds from them and needed to settle the dispute with her brother, as he believed he was the sole inheritor. So not only did she need to receive financial advisory from us but legal advisory from others. She is now a permanent client of ours, all thanks to Instagram.”
(Female, 23, Independent, $100M–$150M AUM)

• “A neighbor of mine heard that I am a financial advisor and was interested in investing and retirement. He found my business through referencing my name and contacted me and we talked immediately. It was quicker through social media than coming to my door one block away.”
(Female, 42, Bank, $150M–$200M AUM)

Q45 In your own words, please describe a success story you have from leveraging social media or social networks for business purposes:
Is social media working for advisors? Where is it going?

**Leveraging referrals through social media**

**Trend**

Note: Base: Social media networks used for business (83%); starting in 2018 question expanded to additional networks beyond LinkedIn, Facebook, and Twitter used for business.

Q46 On a scale of 1 to 5, please rate how significant a role social media plays in your current marketing efforts as a financial advisor/Securities broker:
Is social media working for advisors? Where is it going?

**Social media expected to be significant: Verbatims**

- “Social media is taking the world by storm. People are scrolling through feeds multiple times a day; they are scrolling through while watching tv. So the old marketing way of commercials is becoming irrelevant because no one watches commercials anymore and with social media, you can reach people anywhere. Social media people can spread the word much faster.” (Female, 26, Bank, $150M–$200M AUM)

- “More and more people are using social media platforms to connect and transact many aspects of their lives. Buying financial products and services is no different, as there is a greater audience for doing financial transactions via social media.” (Female, 35, National Full Service, $150M–$200M AUM)

- “More and more individuals are becoming increasingly comfortable with social media. Typically the vast majority of our customers have been an older demographic and have not use social media in the past. Over the course of the last couple of years they have become more comfortable and have used it more.” (Female, 46, $0–$25M AUM)

- “It’s a hub for people looking for certain type of business partners. It’s often used to learn more in-depth things about a person, which helps to develop trust. Therefore, social media is a perfect marketing platform to reach clients and potential prospects.” (Male, 38, Independent, $100M–$150M AUM)

- “Social media sets forth a trend of global instant communication—something that has and will define the coming decades.” (Male, 58, Bank)

Note: Base: Used any social media networks for business and expected to play a significant role.

Q48 In your own words, please describe why you expect social media to play a significant or very significant role in your marketing efforts one year from now:
Is social media working for advisors? Where is it going?

**Strategies for growing social media participation**

- Going deeper with existing social network presences: 60%
- Integrating social media data into my marketing automation system: 53%
- Adding resources to my team with dedicated social media responsibilities: 47%
- Integrating social media data into my CRM: 45%
- Using paid promotion: 38%
- Paying for a premium membership: 38%
- Adding another network to my mix: 32%

*Note: Base: Social media networks used for business and expect social media to play a significant role one year from now (73%).

Q49 As you grow your participation in social media, how do you plan to achieve these goals?
