Putnam Intermediate-Term Municipal Income Fund

A national portfolio of intermediate-term municipal bonds seeking tax-free income with moderate interest-rate sensitivity

Tax-advantaged income

Pursues income free from federal income tax with a portfolio of municipal bonds selected from many states and market sectors.

Fund description

The fund offers investors a national portfolio of intermediate-term municipal bonds (maturities of 3 to 10 years on average) that help provide high current income exempt from federal income tax (but that may be subject to the federal alternative minimum tax).

The fund's managers will combine fundamental research and risk management to construct a portfolio that generally will seek a high rate of tax-free income with less volatility than longer-maturity.

Focus on total return

Seeks to offer a competitive yield and the potential for price appreciation while striving to protect investors' capital through prudent security selection and active risk management.

Sector weightings

Transportation	20.5%
Utilities	12.2
Education	11.7
Local debt	11.2
Health care	11.0
State debt	10.0
Special tax	5.9
Financials	4.0
Other sectors	9.6
Cash and net other assets	3.7

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher (SP-3 or higher, for short-term debt) is considered investment grade. This table reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings may vary over time. Cash and net other assets, if any, represent the market value weights of cash, derivatives, and short-term securities in the portfolio. **The fund itself has not been rated by an independent rating agency.**

High-quality, intermediate-term portfolio

The national portfolio features a range of high-quality, intermediate-term bonds that seek to provide tax-free income with moderate interest-rate sensitivity.

Portfolio quality

AAA	18.5%
AA	31.3
A	30.8
BBB	9.8
BB	1.3
Not rated	4.6

The Bloomberg 7-Year Municipal Bond Index is a subset of the Bloomberg Municipal Bond Index that measures the performance of investment-grade issues with remaining maturities of six to eight years. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg"). Bloomberg or Bloomberg's licensors own all proprietary rights in the Bloomberg Indices. Neither Bloomberg nor Bloomberg's licensors approve or endorse this material, or guarantee the accuracy or completeness of any information herein, or make any warranty, express or implied, as to the results to be obtained therefrom, and to the maximum extent allowed by law, neither shall have any liability or responsibility for injury or damages arising in connection therewith. You cannot invest directly in an index.

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads. Putnam Intermediate-Term Municipal Income Fund received 4, 4, and 3 stars for the 3-, 5-, and 10-year periods among 261, 238, and 177 Muni National Interm funds, respectively.

Morningstar rankings for class Y shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Morningstar. Morningstar rankings may differ significantly from Morningstar's risk-adjusted star ratings. Past performance is not indicative of future results.

Average effective maturity depends on the maturity of the underlying bonds within each fund. The longer the maturity, the greater the interest-rate risk. **Average stated maturity** is determined based on the legal final maturity of a bond. **Duration to worst** is the duration of a bond computed assuming the bond is called at the worst possible time and uses the date associated with the lowest yield. Depending on the interest-rate environment and structure of the bond, there may be scenarios in which the worst possible time for the bond to be paid off is the maturity date. **Option adjusted duration** is the modified duration of a bond after adjusting for any embedded optionality.

Tax-free funds may not be suitable for IRAs and other non-taxable accounts.

Not all share classes are available on all platforms.

Consider these risks before investing: The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings.

Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Bond investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds. Unlike bonds, funds that invest in bonds have fees and expenses. Tax-exempt bonds may be issued under the Internal Revenue Code only by limited types of issuers for limited types of projects. As a result, the fund's investments may be focused in certain market segments and be more vulnerable to fluctuations in the values of the securities it holds than a more broadly invested fund. Interest the fund receives may be taxable. Capital gains, if any, are taxed at the federal and, in most cases, state levels. For some investors, investment income may be subject to the federal alternative minimum tax.

Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund. You can lose money by investing in the fund.
